

Sun KPO , your complete redSling Development Partner

Why **redSling** ?

- Fastest growing **Low-Code / No-Code environment**, designed and developed with Traditional Developers in mind !
- It is a **fully integrated environment, with UX design, Backend Logic Coding , Local testing** and full deployment capability on any cloud / on-prem system (Docker based).
- No limitation on complexity of designs, from simple to most complex enterprise systems.
- Low cost of development, deployment and maintenance, SAAS based pricing.
- Excellent Eco-system of developers, designers and testers to help quickly build solutions.
- Modular and reusable development , supports Agile , fast time to market

Sun KPO **redSling** Offering

- Development partners for redSling (www.redSling.com)
- Sun KPO is 10+ years Application development organization (www.sunkpo.com) offering Web, Mobile and Testing Services
- Rapid application prototyping and development using redSling platform – from concept to delivery in lightning speed.
- Sales, Maintenance and Service for all redSling projects
- Cybersecurity services for redSling applications
- Testing and Test Automation Services for redSling Applications
- redSling consulting services.

Custom Vs. redSling

Feature	Custom (Angular / React)	redSling
Programming Skills	Need Angular/React Full Stack skills	No programming language needed
UI Development	Angular, HTML, CSS, Templates based development	Supports layout and styling based closely resembles traditional layouts
Licensing	Open Source & FREE. Skilled IT resources and IT infrastructure, DB, OS, libraries etc required to prepare a fully managed development environment.	Complete fully managed development platform is free (client needs the license to download the application).
Deployment	Any Cloud or On-Prem, but need to setup everything from scratch	Click and Deploy via Docker Containers, Can work on any Cloud / on-prem
Source Code Ownership	Full Control, Full Ownership	Generated code is independent of the platform, can be used separately, NO vendor lock-in. Full ownership of code
Database Support	Any database can be supported , either directly or via ORM	Relational database supported
No-Code / Low-Code	Not supported, Everything coded manually from Scratch	100% Low-Code No-Code generated models , Fast development cycle times
Cycle Time	Long cycle time in development and testing	Quick design and deployment times.
Platform Less	Run times tied to platform	NO redSling run time, platform independent

Prototyping and Development

Sun KPO team has expertise in **rapidly developing redSling applications** from concept to finish in the shortest possible time. Our certified & expert developers will help you finish your projects faster!

Feature	Services	Tools / Processes
UX Design	High Fidelity Figma prototyping UI / UX design with style and component guide. Ready to use designs in redSling	redSling Builder, Figma, HTML, CSS, UI / UX
Rapid Prototyping	Using redSling framework to quickly come up with clickable prototype to validate design , functional and flow of application	redSling
Development	Web and Mobile application development in redSling platform , end to end services	redSling Development Environment
Integration	Both internal and external REST API based integration	redSling environment
Headless Platform Support	Provide rapid UI / UX to headless platforms, API based applications, Messaging based platforms	UI / UX and Integration Services to API libraries, Postman, Swagger

Testing & Automation Services

Sun KPO testing , test automation and independent product validation services for redSling ecosystem. Tester team has thorough knowledge of redSling platform and deployment

Feature	Services	Tools / Processes
Manual / Functional Testing	Framework based (TestRail) test authoring and manual testing services	TestRail / Regression and Progression Testing
Test Automation Services	Framework based with AI automation , Script authoring and execution, Defect management , Load and Performance Testing , Stress Testing	TestRigor, Mabl, Selenium, Trifecta
Independent Validation and Verification	Full black box testing with only requirement document. User centric testing, Destructive testing and Ad-hoc testing	Complete layman style testing, UI/UX, Navigation, Flows are tested thoroughly
redSling Platform Testing	Application testing on white box – in side developer environment testing to assist rapid development and test cycles. Developer buddy programming to help speed up the work	redSling environment
Mobile Testing	All mobile apps , with and without API's. All formats of mobiles and tablets supported	iOS and Android platforms

Cybersecurity Services

Sun KPO offers special **Cybersecurity services for redSling eco-system** – applications, environment, infrastructure and organization. We offer standards implementation, auditing and testing services

Service	What we offer	Standards / References / Processes
VAPT Services	Full fledged testing services for all applications developed on redSling platform	Vulnerability, Penetration, AppSec, Configuration Assessment, Network Security, Cyber Incidence
Standards Implementation	AppSec, InfraSec and Cybersec implementation and certification guidance	ISO 27001, PCI-DSS, SOC2, HIPPA, HITRUST, GDPR, NIST, ISO 23001 etc.
Audits & Certification Guidance	All types of Cybersecurity audits with tools Gap Analysis and Recommendations	Security Audit, Gap Assessments, Enterprise risk management
Business Continuity Management System	Provide thorough insight and planning into BCP for redSling based applications & business	ISO 22301, ISO 19001
Cyber insurance support	Ransomware prevention audits, Insurance industry risk assessment support	

Product Documentation / E-learning

For any redSling's product's success, it is critical that end user is provided with good documentation and e-learning material (content / learning management system). Sun KPO provides excellent services in this

Service	What we offer	Standards / References / Processes
Functional and Technical documentation	User guides Application documentation Developer documentation	PDF documentation PPT format training documentation
Multimedia Interactive learning Authoring	Application Usage Training Training for Agents, Users AV Multimedia Content development	Interactive media content development Leading authoring tools Adobe Captivate, Articulate Storylines, Lectora, Camcasia
Learning Management Solutions	Support for SCOPE format content and leading learning management solutions Onboarding legacy e-learning content	Moodle, LearnToWin, Disprz, Seek LMS
Training Services	Remote and onsite training on product Training and certification material	Training services and tools
